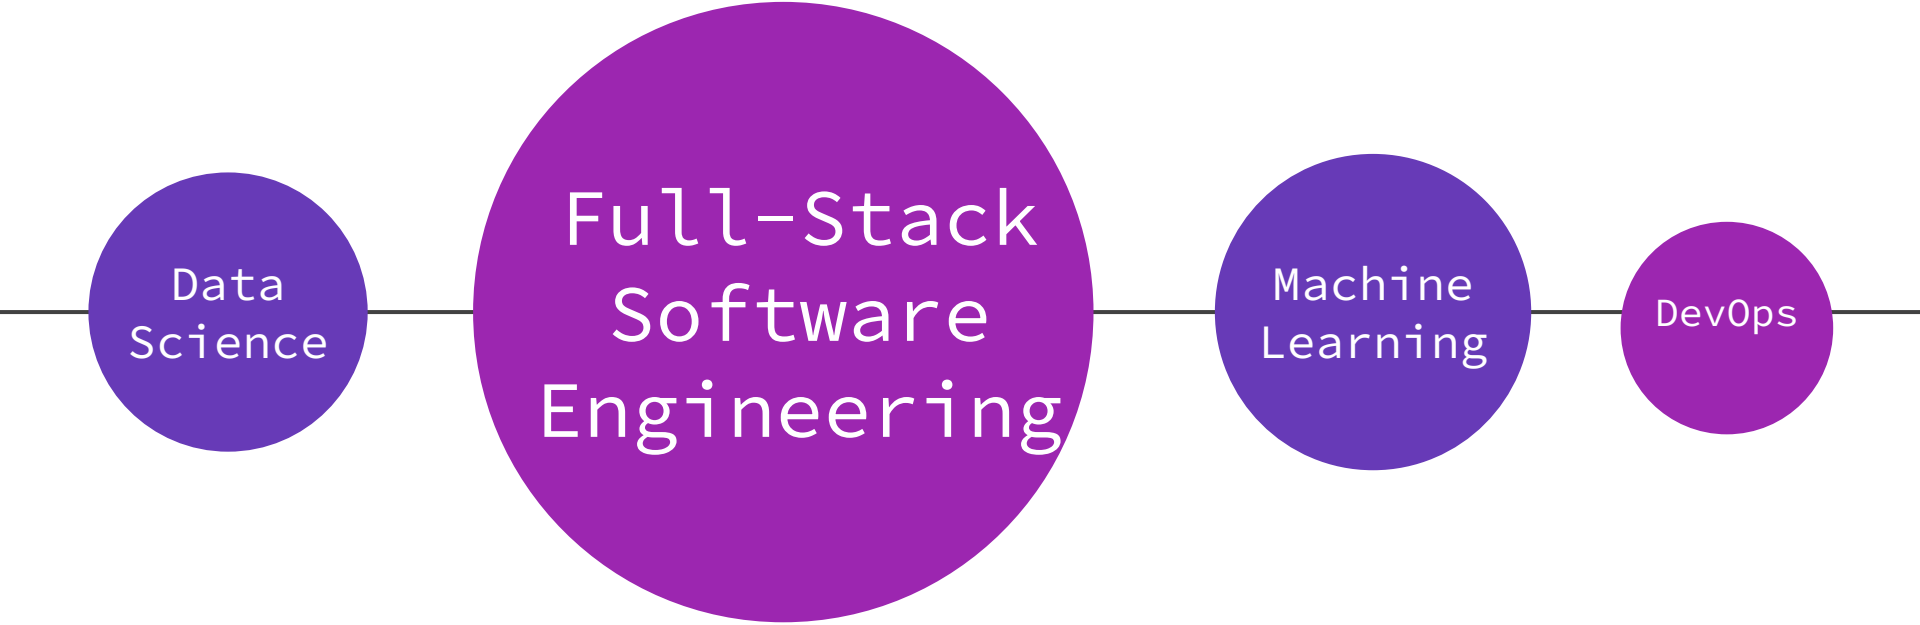
Thabelo Clinton Silima

Full-Stack Software Engineer

About me

As highly skilled and motivated full-stack software engineer, I bring expertise in areas such as Reinforcement Learning, Data Science, and Machine Learning. I am eager to contribute effectively in a dynamic and innovative environment, leveraging my knowledge of Deep Learning, Big Data technologies, and Web Development. Additionally, I am adaptable and open to working in new programming environments 😊

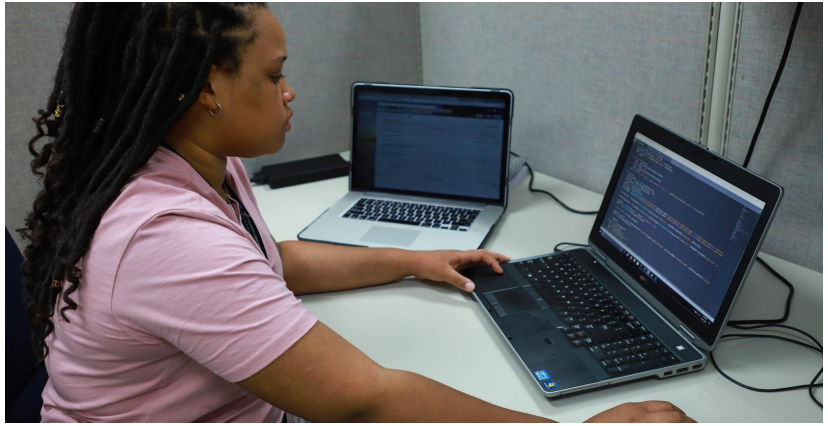
Skills & expertise



Portfolio samples

HAZON VINEX

Improving Projects with Innovation and Technology, The Portfolio Project aims to address the challenge of showcasing one's professional skills, experiences, and achievements in a compelling and organized manner. In today's competitive job market, individuals often struggle to communicate their qualifications to potential employers or clients effectively. Traditional resumes and CVs may not adequately capture the breadth and depth of an individual's expertise, leading to missed opportunities.



HAZON VINEX

While the Portfolio Project provides a platform for presenting professional portfolios, it does not guarantee job placement or client acquisition.

HAZON VINEX

It is essential to recognize that the project serves as a tool for self-promotion and networking rather than a direct solution to securing employment
